WORK EXPERIENCE

World Wide Technology

May 2022 – Present

Technical Solutions Engineer (July 2026 – Present)

Maryland Heights, MO

- Support customer-facing lab engagements in the Advanced Technology Center, provisioning environments, troubleshooting systems, and documenting solutions across networking, virtualization, and storage.
- Participate in a 20-week InfoSec GRC shadowing program spanning governance and policy management, risk assessment, audit and compliance, and application security.
- Serve as the assigned AI mentor for an intern capstone team, advising on AI tools and workflows.

Delivery Operations Analyst (June 2023 – July 2026)

- Automated PMO reporting workflows using PowerShell, generating a daily dashboard distributed to 200+ stakeholders and standardizing data processing across 9 recurring reports.
- Rebuilt the daily PMO reporting dashboard as a containerized application on WWT's citizen-developer OpenShift platform; senior leadership adopted it in its first week and it advanced into IT's test environment.
- Contributed on the TD&E AI Core Team for a PPM platform modernization initiative, working through daily standups, task refinement, and stakeholder progress demos with product owners, engineers, and senior leadership.

Program Management Intern (May 2022 – May 2023)

- Supported complex customer lab engagements run through the Advanced Technology Center with the Global Accounts Lab program management team.
- Placed best in category in the internship capstone, collaborating with a team of interns on an account strategy built from account data and trend analysis.

University of Missouri Division of IT

December 2021 – December 2022

Coordinator Support - Shift Supervisor

Columbia, MO

- Earned promotion within three months to direct daily operations and mentor a team of 30+ Consultants and Support Specialists.
- Built an automated leave-management system using Microsoft Forms and Excel, separating supervisor and employee access to maintain controlled visibility of scheduling data.

EDUCATION

Georgia Institute of Technology

Expected: August 2025 – December 2027

Master of Science, Cybersecurity

Atlanta, GA

Relevant Coursework: CS 6035 - Introduction to Information Security, CS 6250 - Computer Networks, PUBP 6725 - Information Security Policies

University of Missouri

August 2020 – May 2023

Bachelor of Science, Business Administration

Columbia, MO

Minor: Information Technology

CERTIFICATIONS

Cisco Certified Network Associate (CCNA) – Cisco

December 2025

Security+ – CompTIA

December 2024

TECHNICAL PROJECTS

Astro/TypeScript Publishing Platform

June 2026

jseverino.com/portfolio/from-wordpress-to-astro

- Built and maintain a static publishing system sourced from a private Obsidian vault, with Node-based content sync, image optimization, responsive asset manifests, SEO metadata, sitemap/RSS generation, and Cloudflare Pages deployment.
- Implemented automated quality gates across unit tests, Playwright browser tests, visual regression baselines, link checks, page-weight budgets, security-header validation, deploy verification, and CI/CD workflows so releases are deterministic.

Zero Trust Homelab & Private Infrastructure

May 2026

jseverino.com/portfolio/zero-trust-private-infrastructure

- Architected a zero-trust homelab and VPS over a Tailscale/WireGuard mesh with network, host firewall, and application enforcement layers, leaving no self-hosted services reachable from the public internet.
- Hardened Windows, Ubuntu Server VM, and VPS nodes with nftables and Windows Firewall; enforced tailnet-wide encrypted DNS, private internal records, and open-sourced supporting automation tools.
